SUMMARY

Frontend Developer with **4+ years of experience** building **enterprise web applications** serving **1,000+ users**. Strong experience with **React, Next.js**, and **micro-frontend architecture**. Comfortable owning frontend features end-to-end, working closely with **backend and product teams** to deliver **stable, maintainable, and scalable user interfaces** for complex business domains such as HR systems.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+)
 - State Management: Redux Toolkit / RTK Query, Redux, React Query, Zustand
 - Styling & UI: Tailwind CSS, SCSS, Ant Design
 - Architecture & Practices: Micro-frontend, Modular frontend, Agile / Scrum
 - Tooling: Git, Vite, Webpack, Yarn, NPM
-

PROFESSIONAL EXPERIENCE

Software Engineer

Terralogic LLC | Oct 2021 - Present

Ho Chi Minh City, Vietnam

Team size: 12-15

HRMS – Human Resource Management System (1,000+ users)

A centralized enterprise platform for automating HR operations, including employee management, time tracking, leave requests, ticketing, and admin configuration.

Built using **micro-frontend architecture** for scalability and modular development.

- Company Setup Module

Feb 2025 - Present

Developed the Company Setup Module to support onboarding of new tenants.

- Built configuration flows for organizational structure, roles, and default system settings.
- Designed modular and reusable UI components to support future expansion.
- Collaborated with backend teams to align frontend behavior with dynamic configuration data.

Tech: React.js, Tailwind CSS, Zustand, Typescript.

- Ticket Management

Oct 2024- Feb 2025

Developed ticket management features for handling internal issues and service requests.

- Built ticket listing, filtering, and status tracking with role-based access.

- Integrated notification logic to keep users updated on ticket progress.
- Ensured consistent UI patterns across ticket-related modules.

Tech: Next.js, Tailwind CSS, Redux Toolkit Query.

- Timesheet Management

Jun 2024 - Oct 2024

Developed a time tracking module supporting daily and weekly logs for project-based work.

- Handled complex form states, validations, and data synchronization.
- Implemented export functionality and user notifications.
- Improved usability based on internal user feedback and real usage patterns.

Tech: React.js, Ant Design, SCSS, Redux-Saga.

- Admin Portal

Dec 2023 - Jun 2024

Developed and maintained an admin dashboard for system configuration and user management.

- Built scalable table components and bulk action patterns reused across admin modules.
- Implemented secure access control aligned with backend permission models.
- Improved admin workflow efficiency by reducing repetitive manual operations.

Tech: Next.js, Tailwind CSS, Redux Toolkit Query.

- Time Off Management

May 2022 - Dec 2023

Developed leave request and approval workflows for employees and managers.

- Implemented real-time notifications and approval status updates.
- Automated leave balance calculations and synchronization.
- Handled edge cases related to approval rules and leave policies.

Tech: React.js, Ant Design, Redux-Saga.

- Employee Management

Oct 2021 - May 2022

Built core employee management features for the HR system.

- Developed a searchable employee directory with organizational chart support.
- Implemented profile management, filtering, and access control.
- Ensured responsive design and consistent UI across devices.

Tech: Next.js, Tailwind CSS, Redux Toolkit Query.

ENGLISH SKILLS

Intermediate level. Capable of reading and writing technical documentation and communicating in cross-functional teams.

EDUCATION

Bachelor of Automation Engineering Technology

HCM University of Technology | 2013 – 2017.
